Info collected from Stephanie (Jones) Moeller.

Set up a website domain through "Google domain", which is separate from "GSuites."

We can create a website through "Google suites" (Free tool available for non-profits).

The website can be created under the Director of Communications' account or the President's account. This allows us to avoid any outside entities being involved.

Once the site is created, they are super user friendly and easy for people to maintain.

To overhaul the current website we would only be paying someone to do that overhaul.

Stephanie Moeller is willing to help with the website transition should we secure a domain. She will give us a proposal with the cost for that transition and overhaul of the site.

We never moved forward with a contract for Chance Cobb. Stephanie Moeller has worked with Josh Gallagher in the past.

Website redesign can take awhile. Given the content already being there in the current web site already, this will help. Chelsea Sudar will share OCRID's preferences with Stephanie Moeller for her to consider in her proposal.
